

WELCOME TO AADYAM TALENT CONSULTANCY

We just don't train, WE BUILD CAREERS!

ABOUT OUR COMPANY

Aadyam Talent Consultancy is a career-focused organization dedicated to bridging the gap between talented students and leading companies. Our mission is to empower aspiring professionals with the right skills, industry exposure, and career opportunities needed to succeed in today's competitive job market.

We work closely with students to understand their career goals and provide specialized training aligned with their chosen domains. Through structured learning programs, hands-on projects, industry-relevant assignments, and interview preparation, we help candidates become job-ready professionals.

Our strong network of industry connections enables us to guide students toward opportunities in reputed organizations. From skill development to placement support, we stand beside our candidates throughout their professional journey, helping them showcase their potential and secure meaningful career opportunities.

At Aadyam Talent Consultancy, we believe that training alone is not enough. Our focus is on building successful careers by equipping students with practical knowledge, confidence, and industry-ready skills.

MACHINE LEARNING

INSTRUCTIONS

- ◆ Update your LinkedIn profile and mention your internship at **Aadyam Talent Consultancy**.
- ◆ To receive your **Internship Completion Certificate**, you must successfully complete all 3 assigned projects:
 - Level 1 – Easy
 - Level 2 – Medium
 - Level 3 – Hard
- ◆ Create a dedicated GitHub repository using the following format:
aadyamtalentconsultancy_YourName
Example: **aadyamtalentconsultancy_Mahira**

- ◆ Upload all project files, source code, documentation, and updates to your GitHub repository.
- ◆ Submit your completed projects through the task submission email provided by our team. Each submission must include:
 - GitHub Repository Link
 - Completed Project Files
 - Project Documentation (if applicable)
- ◆ Your GitHub repository should be updated regularly and reflect your progress throughout the internship.
- ◆ Weekly evaluation sessions will be conducted via **Google Meet**. Meeting links will be shared through your registered email address.

- ◆ During these sessions, our team will personally review your work, evaluate your progress, discuss challenges faced, and provide guidance for improvement.
 - ◆ Interns may be asked to explain their implementation, project approach, and learning outcomes during the evaluation meetings.
- ⚠ Internship certificates will be issued only after successful completion and evaluation of all assigned projects.

Remember:

"We Just Don't Train, WE BUILD CAREERS!"

SUBMISSION GUIDELINES

- ◆ To successfully complete your internship, you must complete and submit all **3 assigned projects** (Easy, Medium, and Hard).
- ◆ All project work must be uploaded to your designated GitHub repository. Regular commits and progress updates are expected throughout the internship.
- ◆ A Task Submission Form (Google Form) will be shared via email. After completing each project, submit your GitHub repository link and project details through the form.
- ◆ Evaluation sessions will be conducted every **1–2 weeks** via Google Meet. Meeting links will be shared through your registered email address.
- ◆ During evaluations, interns may be asked to demonstrate their projects, explain their implementation, discuss challenges faced, and answer technical questions related to their work.

- ◆ During evaluations, interns may be asked to demonstrate their projects, explain their implementation, discuss challenges faced, and answer technical questions related to their work.

- ◆ Each project will be assessed on:

- Technical Quality
- Creativity & Innovation
- Problem-Solving Approach
- Documentation & GitHub Management
- Presentation Skills

- ◆ Interns are encouraged to maintain a professional LinkedIn presence and showcase their project journey, learnings, and achievements.

- ◆ Originality is highly valued. Projects should reflect your own understanding, implementation, and learning.

🏆 Remember: The goal is not just to complete tasks, but to build a portfolio that demonstrates your skills to future employers.

Machine Learning QUEST

Are You Ready to Play?

Welcome, AI Scientist !

You have entered the **Aadyam Talent Consultancy Challenge Arena**.

Your mission is to complete 3 levels and prove your data skills. Each level unlocks new challenges and brings you one step closer to becoming a certified Data Science Intern.

Difficulty Levels:

-  Easy Level
-  Medium Level
-  Hard Level

EASY LEVEL - Project 1 (do any one)

Student Pass/Fail Prediction (Classification)

 **Mission:** Build a simple classification model using **Logistic Regression** to predict whether a student will pass or fail based on factors such as study hours, attendance, or previous scores.

Deliverables: Source code, model output, accuracy score, and GitHub repository update.

Skills Unlocked: Data Preprocessing, Logistic Regression, Classification, and Model Evaluation.

House Price Prediction (Regression)

 **Mission:** Build a simple **Linear Regression** model to predict house prices based on features such as area, number of rooms, or location. Visualize the relationship between the input features and house prices.

Deliverables: Source code, prediction results, visualization, and GitHub repository update.

Skills Unlocked: Data Preprocessing, Linear Regression, Data Visualization, and Prediction Techniques.

🟡 MEDIUM LEVEL - Project 2 (do any one)

Customer Purchase Prediction

 **Mission:** Build a classification model to predict whether a customer is likely to purchase a product based on factors such as age, salary, or previous purchase history. Clean the dataset, train the model, and evaluate its performance.

Deliverables: Source code, trained model, accuracy score, visualizations, and GitHub repository update.

Skills Unlocked: Data Preprocessing, Classification, Model Training, Model Evaluation, and Data Visualization.

Car Price Prediction

 **Mission:** Build a regression model to predict car prices based on features such as year, mileage, fuel type, and engine size. Analyze the dataset, train the model, and evaluate the prediction results.

Deliverables: Source code, trained model, visualizations, prediction results, and GitHub repository update.

Skills Unlocked: Data Preprocessing, Regression, Feature Analysis, Model Evaluation, and Data Visualization.

HARD LEVEL - Project 3 (do only one)

Disease Prediction System

 **Mission:** Build a simple AI model that predicts whether a patient may have a particular disease (such as diabetes or heart disease) based on medical information like age, blood pressure, glucose level, BMI, etc. Clean the dataset, train the model, and evaluate its performance.

Deliverables: Source code, trained model, prediction results, accuracy score, and GitHub repository update.

Skills Unlocked: Data Preprocessing, Classification, Medical Data Analysis, Model Training, and Model Evaluation.

Fake News Detection System

 **Mission:** Create a Fake News Detection System using Machine Learning. Users should be able to enter a news headline or article, and the system should predict whether it is real or fake.

Deliverables:

Source code files, screenshots, trained model, and project submission.

Skills Unlocked:

Text Preprocessing, NLP Basics, Classification Models, Model Training, and Machine Learning.

Need Help? We're Here for You!

At **Aadyam Talent Consultancy**, our goal is not just to assign tasks but to help you learn, improve, and grow throughout your internship journey.

- ◆ Evaluation sessions will be conducted every 1–2 weeks via Google Meet. The meeting schedule, timing, and joining link will be shared through your registered email.
 - ◆ During these sessions, you can discuss your progress, ask questions, seek guidance, and receive personalized feedback from our team.
 - ◆ If you face any challenges while working on your projects, don't hesitate to reach out. We are here to support your learning and help you succeed.
- 💡 Remember: Asking questions is a sign of learning, not weakness.

"We Just Don't Train, WE BUILD CAREERS!"
